

R&D Engineer

Location: Foshan

Sector: Manufacturing

Starting date: ASAP

Job Reference: CDS-2024-012

ABOUT THE COMPANY

Our client is a worldwide leader in the specialist interconnect field, who offers interconnect solutions for the most challenging markets including aeronautics, space, military, medical, industry, electronic, automotive, energy and research. The group has plentiful experience in designing and manufacturing custom design wires, composite cables, flat flex cables, cable assemblies, stamping, moulded and overmoulded components, connectors and mini-systems for high tech applications.

RESPONSIBILITIES

1. Development of innovative interconnect solution (cables, connectors), either for specific application and/or complete range for specific markets.
2. Development plan and qualification of new materials
3. Development plan and qualification of new processes
4. Project leadership (development, prototyping, qualification, transfer to production)
5. Technology transfer to Engineering
6. Support to Engineering for advanced design and technology

REQUIREMENTS

1. General engineer background (e.g. non-specialized) with either mechanical, electrical, plastic dominant,
2. 3-5 years of working experience
3. Rigor and Appetite for new technologies
4. Creativity and taste for innovation
5. Good listening, speaking, reading, and writing skills in English, familiarity in Chinese or French
6. Ideally with international experience (study, work), best in China or with Chinese for non-Chinese candidate.
7. Proficient in CAD 2D (Autocad) and 3D (Inventor/Solidworks), proficient in pack Office with VBA
8. Simulation softwares experience is a plus
