

Technical Support and Application Engineer East China 技术支持与应用工程师（华东地区）

Location: Shanghai

Company

Our client is a well-known French company in Chemical field and provides environmental friendly high-tech Soldering, Cleaning and Coating solutions for Electronic, Semiconductor, Auto and Industrial applications.

Job Responsibilities:

工作职责

- Technical Support and Application Engineer is responsible for the cleaning and soldering process application support. Including customer initial requests collection, onsite customer support, parameters optimization and technical trouble shooting. Know well the SMT or Semiconductor soldering or cleaning process.
技术支持与应用工程师主要负责清洗、焊接等工艺的技术支持与应用，包括客户初期需求、现场测试、参数优化及问题处理等，熟悉SMT组装工艺或半导体组装工艺。
- To well know customer demands and recommend proper solution and process.
充分了解客户需求，并推荐合适的欧纷泰公司产品及解决方案。
- Good experiences on the SMT process optimization such as stencil aperture design, reflow profile adjustment etc.
良好的SMT工艺优化经验，如网板优化，炉温曲线调整等。
- Be able to make test plan and do the cleaning or soldering test in laboratory independently.
能够独立编写测试计划并在实验室完成焊接及清洗的测试。
- Independent test with customer and do test evaluation, process optimization, finalizing the test result and providing company proposal.
能独立与客户一起进行产品测试，且对测试过程评估、参数优化，对测试结果总结并提供建议。
- Writing test report in Chinese and English.
能编写中英文报告。

Requirements:

要求:

- University degree
大学本科毕业
- Education: Electronic, Engineering, Chemistry, Physics, etc.
相关专业：电子、工程、化学、物理等
- 3 years and above cleaning process or SMT soldering process experience., Prefer cleaning.
3年以上清洗或焊接工艺经验，清洗优先
- Familiar with cleaning process in the production line (SMT, Semiconductor etc.)
熟悉生产线的清洗工艺（如SMT组装、半导体组装）
- Good data collection and analysis, good technical trouble shooting capability
良好的数据收集和分析能力，良好的解决问题的能力
- Good in English reading, writing, basic oral communication

良好的英语读写能力，基本的口语交流能力

- Having driving License
有驾照
