

Quality Engineer

Location: Guangzhou

Sector: Home + Small Appliances

Starting date: ASAP

Job Reference: CDS2026024

ABOUT THE COMPANY

This company provides end-to-end sourcing solutions for businesses looking to manufacture or import products from Asia.

RESPONSIBILITIES

Quality Assurance:

- Understand and discuss customers' quality requirements and associated control plans.
- Effectively communicate and convey these requirements to our commercial teams and suppliers.
- Review product conformity files to ensure they meet current requirements and standards.
- Scrutinize and rectify artwork to ensure compliance and alignment with product specifications.
- Implement and closely monitor the execution of required control plans.
- Proactively identify potential problems and risks, and present quality assurance plans and solutions to customers, balancing risk and cost considerations. Recommend and oversee corrective and preventive actions.

Troubleshooting:

- Identify potential issues at the early stages of projects to preemptively address them.
- Detect and address non-conformities based on inspection and testing reports provided by third-party entities.
- Provide technical solutions to rectify non-conformities, aligning them with partner's requirements.

Communication:

- Engage in effective communication with overseas partners to define appropriate courses of action for specific projects and issues.
- Collaborate with third-party laboratories and inspection companies to implement and oversee TCF (Test, Control, and Follow-up), testing, and inspection services.
- Maintain open lines of communication with suppliers to address client complaints and troubleshoot problems efficiently.

REQUIREMENTS

- Bachelor's degree (or above) in Electrical Engineering or a related discipline.
- Minimum 4 years of relevant experience in the laboratory, manufacturing industry, or buying office.

With over 10 years of experience, CCI FRANCE CHINE Recruitment Department supports companies in their recruitment needs and helps candidates find a professional opportunity across China.

To access more job offers, consult ccifc.org

- Solid knowledge in Electrical and Electronics engineering is essential; familiarity with wireless technology is an advantage.
- Product knowledge of lighting or DIY is a plus.
- Excellent written and spoken English.
- Strong communication and coordination skills to liaise effectively with vendors and overseas customers.
- Proficient in MS Office, particularly Excel.
