

## Robotics Hub Lead & Supplier Quality Manager (Industrial Manufacturing Sector)

**Location:** Foshan

**Sector:** Engineering/Specialty Steel/Manufacturing

**Starting date:** ASAP

**Job Reference:** CDS2026009

### ABOUT THE COMPANY

Operating in more than 40 countries, our client is a global leader in stainless, electrical, and specialty steel, with sustainability at its core.

### MISSION

Our client is looking for a robotics Hub lead to lead the China Robotics Hub, bridging European teams and Chinese suppliers to accelerate automation deployment while ensuring compliance with safety, quality, and IP standards.

### RESPONSIBILITIES

#### Supplier Governance

- Manage the day-to-day commercial and strategic relationships with 4-5 key automation partners in China.
- Mitigate supply chain risks, negotiate delivery milestones, and ensure technical documentation is accurately translated and delivered before payment releases

#### Quality Assurance & Technical Translation

- Understand operational needs defined in Europe and translate them into clear technical requirements for Chinese suppliers.
- Lead and manage Factory Acceptance Testing (FAT), with full responsibility for final approval before delivery to Europe.
- Work closely with the Global Safety and Compliance Officer to ensure all equipment meets local safety and legal standards.
- Collaborate with the Global Program Architect to ensure smooth integration of Chinese equipment with existing systems in Europe and Brazil.

#### Deployment & Implementation

- Coordinate the logistical and technical transition of approved robotics and automation systems from Chinese suppliers to our globe manufacturing sites.
- Support Site Acceptance Testing (SAT) and assist local plant teams during the final commissioning phase to ensure smooth integration into active production lines while minimizing downtime.

With over 10 years of experience, CCI FRANCE CHINE Recruitment Department supports companies in their recruitment needs and helps candidates find a professional opportunity across China.

### Team leadership

- Manage and develop a lean time of local commissioning and quality assurance engineers who will act as your primary operational representatives at supplier facilities, overseeing day-to-day manufacturing progress and code reviews.

### **REQUIREMENTS**

- Master's degree in mechanical engineering, Electrical Engineering, Mechatronics, Robotics, Automation, or a related field.
- Native Mandarin and fluent business-level English.
- Strong expertise in industrial automation; experience in steel, metallurgy, or heavy industry is a plus.
- Proven experience in complex projects, including PLC systems, robotics, industrial protocols (OPC UA, ROS2), and system integration.
- Solid knowledge of European compliance standards (CE marking, ISO 10218, ISO 12100).
- Experience in cross-border technology transfer and adapting equipment to European standards; supplier audit experience is a plus.
- Autonomous, organized, and results-driven, with the ability to operate in a fast-paced environment.
- Strong decision-making skills and leadership presence, with the ability to enforce quality, safety, and IP standards.
- 

### **APPLICATION**
