

Engineering Trainee Program

Company

Our client is a global leader in optimized resource management. With a strong presence in China, it is committed to design and provide water, waste and energy management solutions that contribute to the sustainable development of communities and industries. As a key player in energy management, it has unique expertise in energy efficiency, heating and cooling network management and renewable energy production.

Trainee Program Profile

Now they offer motivated graduates with a maximum of 3 years of professional experience excellent opportunities to join them - as well as long-term prospects.

If you are looking for a challenge, you've come to the right place. We'd like you to step out of your comfort zone and gain valuable frontline experience. You will get to know their local business and operations in no time and have opportunities to build foundational technical and professional skills with hands-on assignments and projects. This program comprises completely different rotations. In the first year you will start your journey in the front line team to build the fundamentals. In the second year, you'll work while deepening your engineering and technical skills for tomorrow.

PROGRAM DETAILS

- 3-year program: 3+ rotations, on-site and Headquarter (Beijing).
- Technical skills development via on-the-job training, classroom and coaching/mentoring.
- Professional skills development in project management.

PROFESSIONAL & PERSONAL REQUIREMENTS

- Master Degree in Engineering, including Energy Engineering, Thermal Engineering, Control Engineering, etc.
- Fluent spoken and written English, ideally very good knowledge of another foreign language
- High level of initiative, willingness to embrace change and capacity for critical reflection
