

PROJECT MANAGER – HARDWARE

Location: Shenzhen

Sector: IT

Starting date: ASAP

ABOUT THE COMPANY

Our client has developed the world's first Android transactional solution to help companies meet their digital transformation goals. We provide a fully integrated, mobile, business-centric and secure end-to-end solution. We target several markets including cashless payment, service management, transportation and access control markets.

MISSIONS

In a context of strong growth, our client is looking for a talented and versatile Project Manager to handle the projects around their range of Products. Technically savvy and well organized you will join the Production team based in Shenzhen (HQ in Paris) and contribute to some of our roadmap delivery for 2020 and onwards. Lead the flawless delivery of projects in time and within budget across functional teams. You are the owner of projects coordination with third parties/vendors located in Shenzhen and Shanghai.

RESPONSABILITIES

- Coordinate and manage supplier and contract manufacturing activities to deliver on project objectives.
- Manage the relationship with the client and all stakeholders.
- Ensure that all projects are delivered on-time, within scope and within budget.
- Assist in the definition of project scope and objectives, involving all relevant stakeholders and ensuring technical feasibility.
- Ensure product performance meets engineering and product specifications.
- Develop a detailed project plan to monitor, track progress and input changes as necessary.
- Measure project performance using appropriate tools and techniques.
- Highlight issues in advance and leads efforts to develop and implement alternatives and escalate as needed.
- Facilitate regular status meetings and ensure seamless communication with other functional areas.
- Prepare and maintain Issues/Action Item database.
- Create and maintain comprehensive project documentation.

REQUIREMENTS

- have a **degree in Computer Science or Electrical Engineering** (extra points for Embedded systems specialty). Working knowledge of hardware is a big plus. Ability to read and understand electrical schematics and wiring diagrams is also highly sought after.
- have at least 2 - 3 years' **experience in Project Management** with consumer electronics and experience in the consumer hardware development process.
- passionate about **new tech and especially mobile and Android technologies**.
- customer oriented.
- **speak English and Chinese fluently** and want to work in an **international context**. Speaking French is a plus.
- have strong communications skills, teamwork and interpersonal skills.
- have a strong stellar problem-solving skill.
- utilize various **technologies** and tools to effectively manage projects and provide clear and concise communications to teams and stakeholders.
- a problem-solver keen to find **innovative solutions** in any situation.
- super **enthusiastic** and like to be challenged!
- can work with tight deadlines and can prioritize conflicting priorities.
