

Senior Industrialization Manager

Location: Dongguan

Sector: Kitchenware

Starting date: ASAP

ABOUT THE COMPANY

Our client is one of the world largest manufacturers of kitchenware, bakeware, kitchen tools, and ice craft. They work exclusively with partners widely recognized in each continent and with famous brands. The full manufacturing integration allows them to bring complex developments to another level, insuring the highest confidentiality. They have a Research & Development team both in France and in China.

MISSIONS

They are now looking for a high-potential Industrialization Manager to lead the different industrialization departments and ultimately enable and improve products' development into mass-production. The candidate will be working in the domain of manufacturing silicone / plastic / metal industry.

RESPONSIBILITIES

- 1. Participate in the analysis, formulation, and implementation of the company's industrialization strategy;
- 2. Guarantee the effectiveness of the technical choices adopted at the manufacturing level, and verify the industrial feasibility of these methods by performing tests against manufacturing;
- 3. Lead and coordinate the different industrialization departments to achieve the company's objectives - industrialization engineering, product engineering and mold departments;
- 4. Collaborate closely with the R&D team in Hong Kong and Industrialization Director in China to enable products developments to be mass-produced, give feedback about industrialization improvements;
- 5. Work closely with the Production Manager in the development of methods and action plans concerning production as well as the planning of specifications;
- 6. Maintain a permanent watch and identify any dysfunctions, whether at the level of processes or at the level of supply flows, and resolve technical problems as quickly as possible in order to ensure that the established deadlines are met.

REQUIREMENTS

- Rigorous, excellent communication and leadership
- Integrity, responsibility, and proactive character
- Education background: Engineering Bachelor degree or above, mechanical / automation / industrial engineering preferred;
- More than 10 years industrialization experience with more than 5 years team management experience;
- Experience working with silicone / plastic / metal industry is preferred;
- Professional skills: familiar with 5S, have the skills of Applying ISO / TS16949 and ISO14001, OHSAS18001 system standards, SolidWorks 3D;
