

## General Manager

### Company

Our client is a lost-wax foundry. To pursue its expansion and growth, a brand-new plant with latest state of the art equipment is just starting in Wuhan (Hubei). This foundry belongs to a global group of Heat Treatment.

### Responsibility

The GM has overall responsibility of managing both revenue and costs elements of the company income statement. He oversees the sales functions as well as the day-to-day operations of business, concentrating mainly on production, engineering, and development.

- Concentrate on the production of the new plant project.
- Coordinate all plant processes and departments involved: planning, development of new parts, Quality, maintenance, costs...
- Take responsibilities to Finances, Sales, HR, and current lost-wax foundry.
- Oversee Daily business operations.
- Create and manage budgets.
- Improve revenue.
- Pay particular attention to Human Resources, 5S and Safety.

### Requirements

- Experiences in international business.
- Be familiar with both Chinese and western cultures.
- Speak fluently English, Chinese, and ideally French.
- Technical background and Experience in plant management of metal plant (Forge, foundry) will be a plus.
