

## Program Manager

**Location:** Beijing

**Sector:** Aviation

**Starting date:** ASAP

### ABOUT THE COMPANY

Our client is a full round of cooperation from technical research to product development and production on civil turboprop engine power turbine and flame tube, providing modules for mother companies Grand Groups manufacturing aircraft engines.

### MISSIONS

The job context is related to the turbo propeller engine design activities with 2 modules concerned: the flame tube and the power turbine.

The Program Manager is a strategic project-management professional whose job is to help oversee and coordinate the various projects, products, and other strategic initiatives across the organization.

The program manager's job is to take a high-level view of the entire program, and strategically guide project managers to ensure they are all working effectively toward the program's objective, he is a super project manager. His/her role is mainly operational since he/she is responsible for planning, governance and for overseeing the successful delivery of the program's output/product. Based on the customer needs, the main role of this position is to coordinate the project management plan of the whole life cycle of the project including the planning, implementation, control and closure and ensure the effective implementation of the project management system, and take the responsibility of focal point with mother companies about the projects discussions;

The main mission for this job is, but not be limited to:

- to define the program governance (controls);
- to collect the technical requirement given by mother companies and to build the related project charters with the technical team;
- to follow-up the design and manufacturing period (classic or additive manufacturing means);
- to plan and follow up the overall program and monitoring the progress;
- to update the technical working plan of the teams regarding the objectives defined;
- to set-up and update the schedule and the risk analysis;

With over 10 years of experience, CCI FRANCE CHINE Recruitment Department supports companies in their recruitment needs and helps candidates find a professional opportunity across China.

- to lead the projects reviews internally to the Company, and externally with the stakeholders and/or partners and/or customers;
- to be the focal point regarding the related projects with the mother companies, the potential partners and/or customers;
- to prepare the potential commercial proposals based on the project charters;
- to manage the programs' budgets, follow-up and control costs;
- to work in a team with high communication with colleagues;
- to work in a multi-cultural environment.

## REQUIREMENTS

Project management skills required with minimum 5 years of experiences in the field to follow and lead technical teams on both technical perimeters (flame tube and turbine) with low support of mother companies,

- Good knowledge of a Turbo propeller and/or Turbo shaft architecture,
- Good Knowledge of Project Management Tools,
- Mechanical Technical background (Thermal and/or aero dynamical knowledge will be appreciated),
- Basic Knowledge of Siemens numerical tools (NX CAD, NX CAE, NX Thermal) could be helpful,
- Good communication with others required in a multi-cultural team, creativity and open mind mandatory
- English language intermediate level required; French skills appreciated
