

Attending Physicians

Location: Foshan

Sector: Health, Medical & Pharmaceutical

ABOUT THE COMPANY

Our client is originated from the initial mind of the founder of a Fortune 500 company, based in Foshan city, Guangdong Province. The founder hopes that the hospital will benefit for the neighbors and feedback to the community. Listed as the key project by People's Government of Guangdong, the hospital will be in operation in June of 2024.

The hospital is designed and built upon the standard of 3A-Grade general hospital and JCI accreditation system. It covers an overall floorage of 38,000 square meters in 30.6 acres, scheduled to incorporate 1,500 beds. The HPHIC is under construction at the same time. The related function centers are to built for medical research, transformation and academic activities in the 2nd phase. 13.8 acres for talent community is also under construction around with more than 1,000 apartments for the staffs. Another 19.1 acres are preserved for the future development.

1. The hospital is to be built upon the national requirements OF 3A-Grade general hospital as well as JCI accreditation system to meet international standard of medical care quality and specialties are setup as followed.
2. The hospital will prioritize the development of multiple Centers od Excellence (COEs), such as cancer center, orthopedics and sports medicine center etc..
3. The hospital will also be accredited as National Chest Pain Center, National Stroke Center, National Trauma Center etc. step by step in the future.
4. The hospital is going to establish International Medical Center, which will be built upon international standard of medical quality, to provide a high-quality health care service for patients from the Pearl River Delta and the world.
5. The hospital is to be equipped with cutting-edge medical equipment. It plans to bring in the latest high-end medical equipment from over the world. The equipment include proton-heavy ion system, 3.0MRI, 256-or-higher-slice CT, dual-energy linear accelerators, MgGFU, VisuMax femtosecond laser system, surgical robotics etc..
6. The hospital will provide high-level laboratories, professional research teams, and considerable research funds to leading researchers in their fields.

The hospital will setup the scientific research fund for clinical and biomedical transformation research.
